Top Skills

Computer Vision
Agentic AI Development
Retrieval-Augmented Generation (RAG)

Languages

English (Full Professional)
French (Professional Working)
Arabic (Native or Bilingual)

Certifications

Python for Computer Vision with
OpenCV and Deep Learning

Mohamed Eltoum

R&D Engineer | Computer Vision | at AutosOnShow
Chesterfield, England, United Kingdom

Summary

Senior Computer Vision Engineer with 4+ years of experience designing, developing, deploying, and optimising production-grade computer vision systems on cloud infrastructure. Strong background in image processing, object detection, image segmentation, pose estimation, model optimisation, and scalable ML inference for real-world automotive imaging operations. Experienced across the full computer vision lifecycle, including data preparation, model training, evaluation, deployment, monitoring, performance optimisation, and integration with APIs and cloud-native platforms. Proven ability to translate business requirements into reliable AI products, improve model performance and deployment velocity, and provide technical leadership across research-to-production computer vision initiatives.

Experience

AutosOnShow

Research And Development Engineer
January 2022 - Present (4 years 8 months)
Cardiff

- Led the design and deployment of AI solutions supporting large-scale automotive imaging operations, collaborating with stakeholders to translate business requirements into production systems.
- Architected cloud-native AI workflows using AWS SageMaker, Lambda, API Gateway, and Terraform, improving deployment velocity by 40%.
- Provided technical leadership for AI initiatives spanning Computer Vision, Generative AI, Multimodal AI, RAG systems, and Agentic AI, integrating modern AI technologies into production workflows.
- Designed and implemented Retrieval-Augmented Generation (RAG) systems to combine enterprise knowledge with LLM capabilities, enabling context-aware AI applications and intelligent information retrieval.
- Worked cross-functionally with product, operations, and business teams to identify AI automation opportunities, define technical solutions, and drive measurable operational improvements.

- Mentored junior engineers and promoted best practices across AI/ML model development, LLM applications, RAG architectures, cloud deployment, and software engineering.

University of South Wales

Student

September 2020 - September 2021 (1 year 1 month)

Cardiff, Wales, United Kingdom

Abdul Latif Jameel International

4 years 10 months

Service Manager

April 2018 - September 2018 (6 months)

Saudi Arabia

- Improving quality assurance by reducing repeated repairs and improve technician training
- Plan and monitor overall technical sales targets and achieve 15% sales increase with 90% customer satisfaction.

Service Advisor

December 2013 - March 2018 (4 years 4 months)

Saudi Arabia

- Generated over USD 3.5M in sales revenue over five years , process an average of 40 vehicles a day.
- Awarded best Service adviser in my Centre in October 2017.

Bavarian Auto Group

Workshop and Quality Controller

February 2012 - November 2013 (1 year 10 months)

Khartoum, Sudan

- Provided front-desk technical support for a service advisory team of 21 technicians.
- Improve vehicle service turn-around time by 30%.

Education

University of South Wales

Master's degree, Artificial Intelligence · (September 2020 - September 2021)

Sudan University of Science and Technology
